

EPR FireWorks Missing Incident Reports

Here is the link to access fireworks in the web browser. <https://login.eprsys.com/home/login>
Please bookmark this.

This guide will help you broaden your search results for reports you can't find in the system.

By default, our system only displays all reports (draft, completed, reopened, and approved), except canceled reports. You must explicitly search for canceled reports in the advance search box.

If you cannot find your report in the default search results, change the Time to "All", to search for all date range. If the report is not there, change the Incident status to "Cancelled".

This will display all the cancelled reports.
